

## **COMP405: Introduction to the Internet & Web Authoring**

Course Description: Fall 2015

**Karla Vogel, Instructor**  
kv@unh.edu

This course surveys the fundamental technologies, protocols, and practices that make up the Internet. The course will address the Internet as a global information system that has transformed the current business environment. Topics include: Internet structure; applications; business uses; legal and ethical issues introduced by networked computers such as privacy, fraud, and security. A significant portion of the course covers web authoring procedures and languages. Students will create a web site using html5 language. No prior computer experience is required. No credit for students who took CS403. (*Catalog description*)

### **COURSE GOALS:**

- Learn the history, technology, resources and effective use of the Internet.
- Explore the WWW as a publishing medium and learn to compose web pages in HTML5 code.
- Examine the social implications of a networked world.

### **COURSE MATERIALS:**

- Readings and web sites posted on Blackboard Course Site.
- Felke-Morris, Terry. Web Development and Design Foundations with HTML5, 7<sup>th</sup> ed. Boston: Pearson, 2015. Print.
- Web pages:  
<https://blackboard.unh.edu/>  
<http://pubpages.unh.edu/~kv>
- Website account at UNH
- Flash drive or online storage for data files

### **CLASS MEETING:** Monday: 9:00 – noon

Class will consist of lecture material supported with demonstrations of software and network concepts. Completing the weekly reading and written material is important for a successful class experience. This course is not designed as a "hands on computer" course; however there are directed lab projects for a portion of the class time. *Excessive absence or late arrival to the class can impact your overall success in the course.*

### **COURSE GRADE:**

Weekly Assignments: 25%  
Two exams @ 25%  
Two quizzes @ 10%

CyberIssue Journal: 15%  
Class Activities: 10%  
Web Project: 15%

## **HOMEWORK ASSIGNMENTS:**

Independent lab and reading assignments are issued and collected on a weekly basis.

Assignments are available on Blackboard at the end of each class meeting. Unless specifically stated, the major portion of the course work will be done using a browser, word processing application, and an ASCII text editor. You may use your computer systems at home, but directions and explanations will be given based on the UNHM computing environment.

The homework is designed to build your understanding of the course readings, use of the Internet and develop your ability to code in HTML5. Topics from the homework will be used in class review activities and exams.

**Assignments are due at the start of the class for which it is designated.** It is your responsibility to allow enough time during the week to complete the homework activities despite obstacles (technology driven or personal) that may arise.

Late assignments are not accepted unless prior arrangements are made via email or in person. Late work is anything submitted after the start of class. Specific page numbers and activities are referenced using the "official" textbook. Use of eBooks or older versions of the textbook may not necessarily conform to the requirements in the assignment.

Assignments are evaluated for completeness and accuracy per section of work.

1 = complete and accurate.	.75 = incomplete or inaccurate segment.	
.5 = half completed material	.25 = one fourth completed material	0 = not done

Totals are accumulated in the Blackboard grade book. Keep track of your progress at this location and report any discrepancies you notice.

**Note:** *UNH recommends a minimum of 12hrs./week of academic work. The class accounts for 3 of those hours, leaving 9 hrs each week for outside class work. (See Section 04.2 Class Requirements of student handbook)*

## **CYBERISSUE ACTIVITY:**

This activity is to explore the pros and cons of a particular issue of our networked society in a web journal. Details are explained in class and the activities are scheduled throughout the semester.

## **QUIZ and EXAMS:**

These are based on homework material, class presentations, and lab activities. Review sheets for these are presented one week prior to the exams. These cannot be made up if you are absent without prior 24hr email notice or appropriate documentation.

## **CLASS ACTIVITIES:**

Your participation in the weekly lab activities and attendance are taken into consideration for final grade in the course. The class starts promptly at 9am.

## **WEB PROJECT:**

This project is designed to apply your web authoring knowledge by creating an original multi-page web site. It is also intended to give you experience in the design aspects of developing an effective Web presentation. Web projects are posted on UNH's web server for grading and public viewing.

## **BLACKBOARD & UNH eMail:**

Course documents, readings for weekly assignments, announcements, lab files and external links are available on Blackboard. Please check your Blackboard course site frequently in the event there are announcements and clarifications about the class activities. If you are absent, you are expected to retrieve the assignment from Blackboard and remain current with class material. Relevant documents are posted on the same day as the class meeting.

Specific communication to you is done through the UNH email service. You are expected monitor it for official communication from the college. If you choose to forward your mail to another service, it is your responsibility to monitor current email notices.

## **COURSE POLICIES:**

- Your participation in this course is valuable. Questions, observations and attention in class are important to the quality of our learning community.
- Arriving late is a disruption to the class and impacts your performance in the course. If you must leave before the end of the class meeting, please let me know prior to start of class.
- Excessive absence will adversely affect your ability to successfully complete the course. While use of Blackboard and email facilitate the course delivery, they are not intended to replace class attendance.
- All cell phones **must** be muted at the start of class and **remain in your bag or pocket until the break**. All calls should be returned outside the classroom during the break period.
- Computer use during class will be organized as part of class activity. Personal laptops may be used during those activities. No other use of a laptop during class is permitted unless specific arrangements are discussed prior to class.

**NOTE: I will ask you publicly to power off your devices if you are actively using them during class lecture time.**

## **UNHM Computer Use:**

Academic computers are available in the 2nd Floor Learning Commons and the First Floor Hallway (south end). Software to complete course activities is installed on each student computer. You may also check out a Learning Commons Laptop for a period of 4-hours that be used anywhere within the campus building.

Printing requires a UNH ID card valued with Cats Cash to retrieve your document at the printer station. Printers are located on the First Floor, Learning Commons, and Computer Classroom. Color printing may only be sent to the Learning Commons unit.

*If you need assistance finding the printing station, ask the attendant at the Learning Commons Help Desk.*

**ASSISTANCE:**

I will remain in the lab classroom one hour after class for course assistance. Please email if you need to meet at a different time. I do not have an office at UNHM, but will make arrangements to meet with you for extra help.

The Learning Commons Help Desk staff can answer operational questions regarding the technology on campus. They do not provide assistance with course work or specific software applications.

**COLLABORATION:**

Assignments and projects are designed for individual composition, unless specifically noted. Please be familiar with the University's position on academic honesty and the consequences of plagiarism as detailed in the student handbook. If directly quoting material from the textbook or web source in your homework, indicate with quotation marks and source. Citing web resources will be covered in class. Example: "*The Internet is a network of networks.*" (Schneider, 53)

The web project is designed as an individual project with specific criteria for completion. Outside assistance from professional web developers or use of web authoring suites is considered an act of plagiarism and will be handled as detailed in the student handbook. **COMP405: Introduction to the Internet and Web Authoring**  
**Course Syllabus: Fall 2015, Monday 9 - noon**

Karla Vogel, Instructor      kv@unh.edu

(Note: exact dates and topics may vary from week to week. Specific updates are posted on <http://blackboard.unh.edu>.)

All assignment details are posted on Blackboard for you to download.

<b>Week One: 8/31</b>	<b>Introduction to course procedure &amp; requirements</b> Network technology overview  <b>Assignment 1: Networks at work</b> (download from BB Assignment section)
<b>Week Two: 9/14</b>  Introduce CyberIssue Project	<b>Development of the Internet.</b> <b>Making the Internet Work</b>  <b>Assignment 2: The WWW vision and development</b> (download from BB Assignment section)
<b>Week Three: 9/21</b>	<b>The World Wide Web &amp; beyond:</b> <b>Technologies that make the WWW work.</b> <b>Features of Web2.0 &amp; Web3.0</b>  <b>Assignment 3: Search Engine options and technology</b> <b>Felke Ch.2: create web page.</b> (download from BB Assignment section)
<b>Week Four: 9/28</b>	<b>Search Tools and Techniques to locate relevant, reliable information.</b> <b>Using text block tags in HTML5</b>  <b>Assignment 4: Online communication protocols</b> <b>Felke Ch.2: Textblocks.</b> (download from BB Assignment section)
<b>Week Five: 10/5</b>	<b>Communication protocols: eMail to Twitter</b> <b>Making Lists in HTML</b>  <b>Assignment 5: Virtual Communities</b> <b>Felke Ch.2: Making Lists</b> (download from BB Assignment section)

<b>Week Six: 10/12</b>	<b>Virtual Communities &amp; Social Media</b> <b>Create the web server space</b> <b>Add home page with hyperlinks to web pages.</b>  <b>Assignment 6: Using style sheets</b>
<b>Week Seven: 10/19</b>	<b>Website organization and hyperlinks</b> <b>Introduction to styles in html5</b>  <b>Assignment 7: Study for exam 1</b> <b>Update your home page with styles and hyperlinks</b>
<b>Week Eight: 10/26</b>	<b>Exam 1: 1.5 hrs (class activity will follow exam)</b>  <b>Project Introduced</b>  <b>Assignment 8: Computer and Network Security.</b> <b>External style sheets</b>
<b>Week Nine: 11/02</b>	<b>Network Security</b> <b>Uses and benefits of style rules</b> <b>Introduction to web graphics: file formats and code</b>  <b>Assignment 9: Visual Elements &amp; Web Graphics</b> <b>Project development: goal, audience, flowchart</b>
<b>Week Ten: 11/9</b>	<b>Project development: storyboard use and creation</b> <b>Guidelines and code for web graphics.</b> <b>Introduction to page layout css rules</b>  <b>Assignment 10: Web Design Considerations</b> <b>CSS for page layout</b> <b>Project development: storyboard</b>
<b>Week Eleven: 11/16</b>	<b>Design Guidelines</b> <b>Creating tables</b>  <b>Assignment 11: Using Tables for data and layout</b> <b>Multimedia on the web</b>

<b>Week Twelve: 11/23</b>	<b>Adding media using HTML5 Form page elements.</b>
	<b>Assignment 12: Creating Form Input</b>
<b>Week Thirteen: 11/30</b>	<b>Project development to code the index page using css or table structures.</b>
	<b>Study for exam 2</b>
<b>Week Fourteen: 12/07</b>	<b>Exam 2 (1.5 hrs.)</b>
	<b>Project development.</b>
<b>Week Fifteen: 12/14</b>	<b>Present Web Project prototype Finish and test projects in lab</b>
